EDUCATION

Universidad Adventista del Plata	**2020 – 2024**
Information Systems Engineering	*Entre Rios, Argentina*

Educación IT	**2024**
Cloud Computing: Cloud Infrastructure	

Udemy	**2024**
NestJS + Microservices	

EXPERIENCE

Universidad Adventista del Plata	**June 2024 – Present**
Full Stack Developer	*Entre Rios, Argentina*

- Designed and implemented a data integration system enabling external businesses to access and consume data for over 3,000 users, improving system interoperability.
- Modernized 5+ legacy systems, aligning them with updated TSL standards to enhance security and compatibility.

Xirect Software Solutions	**August 2023 – June 2024**
Full Stack Developer	*Remote*

- Led the design and development of embedded LMS software used by over 10,000 users, optimizing training processes and business operations.
- Collaborated on a hybrid mobile and web application to automate lead management, leveraging React.js and Nest.js to improve development efficiency and user experience.

Mi Portafolio Digital	**October 2022 – August 2023**
PHP Developer	*Remote*

- Resumed development of a partially completed e-commerce website (traedeusa.com), integrating with 4 different external businesses via API, such as Amazon.
- Integrated the platform with 4 payment gateways, enhancing user experience and operational efficiency.

PROJECTS

Real Estate Scheduling Plugin | *React.js, Nest.js, Material UI, Docker, GitHub Actions* — **2025**

- Designed and implemented a **React.js and Nest.js** plugin to automate property visit scheduling for real estate websites, enabling users to book viewings online.
- Utilized Material UI for the UI and leveraged **Docker** and **GitHub Actions** to automate deployment and streamline the CI/CD pipeline.

Spendings | *Next.js, OpenAI API, Telegram, WhatsApp Api, PostgreSQL, Shadcn UI* — **2025**

- Built a personal finance tracker with a modern UI and PostgreSQL backend to log expenses and visualize financial data.
- Developed **Telegram and WhatsApp bots** that allow users to register transfers by sending receipt photos.
- Integrated **OpenAI API** to automatically extract transaction details from images and store them as structured data.

Alta Charla | *Next.js, Tailwind CSS, MongoDB* — **2024**

- Built a Next.js web platform for an English teacher offering online Spanish lessons to U.S.-based students.
- Developed a responsive landing page with Tailwind CSS and integrated a MongoDB-backed calendar-based booking system for lesson scheduling.
- Implemented user authentication and payment processing for seamless lesson booking experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL, HTML/CSS
Frameworks & Libraries: React.js, Next.js, Nest.js, Node.js, Tailwind CSS, Material UI
Technologies & Tools: Docker, Kubernetes, Google Cloud, GitHub Actions, MongoDB, MySQL, WhatsApp API
Languages: Spanish (Native), English (Advanced B2)
