PROFESSIONAL EXPERIENCE

Universidad Adventista del Plata   *May 2023 – Present*
Full Stack Developer

- Modernized 5+ legacy systems, aligning them with updated TSL standards to enhance security and compatibility.
- Designed and implemented a data integration system enabling external businesses to access and consume data for over 3,000 users, improving system interoperability.

Xirect Software Solutions   *August 2023 – June 2024*
Full Stack Developer

- Led the design and development of embedded LMS software used by over 10,000 users, optimizing training processes and business operations.
- Collaborated on a hybrid mobile and web application to automate lead management, leveraging **React.js** and **Nest.js** to improve development efficiency and user experience.

Mi Portafolio Digital   *October 2022 – August 2023*
Php Developer

- Resumed development of a partially completed e-commerce website (traedeusa.com), integrating with 4 different external businesses via **API**, such as Amazon.
- Integrated the platform with 4 payment gateways, enhancing user experience and operational efficiency.
.

PERSONAL PROJECTS

Real Estate Scheduling Plugin

- Designed and implemented a plugin to automate property visit scheduling for real estate websites, enabling users to book viewings online.
- Utilized **Docker** and **GitHub Actions** to automate deployment and streamline the CI/CD pipeline, ensuring consistent and efficient delivery across environments.

Alta Charla (altacharla.com)

- Built a web platform for an English teacher offering online Spanish lessons to U.S.-based students.
- Developed a responsive landing page for self-presentation and integrated a calendar-based booking system for lesson scheduling.

Clinic Management System

- Created an internal system for managing users, scheduling appointments, and automating reminders using a WhatsApp chatbot.
- Implemented organized tracking of electronic health records (EHR) to streamline clinic operations.
